

DevOps Engineer (m/f/d)

Remote – Freelance/Contract on long-term basis

Join us on our mission to digitalize and transform the shipbuilding industry! We are looking for a **DevOps Engineer** who will play a major role on our way to develop a full-fledged 3D ship design software in the cloud for the era of connected shipbuilding.

Your Role

- You will play a key role in designing, implementing and maintaining a complex infrastructure for a demanding SaaS platform
- Optimise build pipelines and artifacts
- Take care of backups, monitoring, disaster recovery plans

Your Skills

- You have an excellent sense for infrastructure and CI/CD
- You are familiar with the services at AWS
- You know how to secure data against various scenarios
- Some (programming) experience with GraphQL, NodeJS, Postgres would be an advantage

Our promise

- You will work on a challenging project based on cutting-edge technology
- You will have the chance to qualify yourself as the team lead for software development
- You will have the freedom to develop and implement your own ideas
- An inspiring work environment with a great team
- Flexible working hours and remote working possibilities

Our techstack

Sounds exciting? We are looking forward to hearing from you! Send us your CV and join us on our mission to disrupt the shipbuilding industry:
