

Senior Software Engineer – Frontend (m/f/d)

Remote – Freelance/Contract on long-term basis

Join us on our mission to digitalize and transform the shipbuilding industry! We are looking for an experienced **Frontend Developer** who will play a major role on our way to develop a full-fledged 3D ship design software in the cloud for the era of connected shipbuilding.

Your Role

- You will play a key role in our frontend development of a modern web client and component library based on Angular and PrimeNG
- Design and implement UI components for a unique web-based 3D ship design software
- You will drive the UI/UX design forward to create an outstanding product

Your Skills

- You are an experienced developer and successfully worked on challenging projects
- You have a broad range of skills with frontend technologies that fit our techstack (see below)
- You are familiar with relevant design patterns & principles and you are looking forward to realize them
- You have a curious and creative mindset, always on the lookout for ideas on how to revolutionize the current state of the art
- You are eager to learn, proactive and have great problem-solving skills

Our promise

- You will work on an exciting project based on cutting-edge technology
- You will have the chance to qualify yourself as the team lead for software development
- You will have the freedom to develop and implement your own ideas
- An inspiring work environment with a great team
- Flexible working hours, long-term personal development perspective

Our techstack

Sounds exciting? We are looking forward to hearing from you! Send us your CV and join us on our mission to disrupt the shipbuilding industry:
